

## Versora Press Release

### **Versora Announces Technology Partnership with StompSoft by Migo for Microsoft Vista Migrations**

*Easy PC Transfer- Providing consumers & small businesses easy migrations from Windows XP & Windows 2000 to Windows Vista*

**Santa Barbara, CA– February 13, 2007** –Versora, a global leader in desktop migration software announces a technology partnership providing Progression Desktop for Windows technology to Migo Software.

“Versora not only has the most extensive experience in the desktop migration space, they also have the most advanced technology for moving from Windows 2000 or XP to Windows Vista”, notes Senior VP of Corporate Development for Migo Software Michael Hummell. “We are looking forward to helping people move to Windows Vista using Easy PC Transfer.”

Easy PC Transfer moves mp3's, photos, videos, documents, Internet settings, program settings, preferences, email, address books, calendar entries and more to Microsoft Vista. The product will save users hours setting up their new Vista PC. Easy PC Transfer also includes a high speed PC to PC data transfer cable that can be used to connect the old and new computer to make the migration quick and easy.

“Stompsoft by Migo has an outstanding reputation in the retail market,” said Versora VP Product Management Matthew Warne. “Stompsoft’s reach into the “brick and mortar” resale channel is unprecedented and we anticipate great success for Easy PC Transfer.”

Easy PC Transfer supports email accounts and settings from the Outlook, Outlook Express, the new Windows Mail and Lotus Notes. The product also migrates browsers favorites and cookies from IE and Firefox. Easy PC transfer also moves desktop settings including printer, network, desktop appearance and shortcuts, wallpaper and display settings. Support for the popular Instant Messenger Programs such as AIM, MS Messenger as well as popular Personal Information Manager (PIM) settings for Palm and Blackberry desktop are all provided.

Easy PC Transfer supports cross version migration for almost all applications, including nearly all Microsoft applications and even open source applications such as Firefox, Thunderbird and OpenOffice.org.
